

EVERREST

London – 10th March 2015

The EVERREST Coordinator, Dr Anna David, presented to a general audience in a Lunch Hour Lecture at University College London about her research into how to improve the growth of small babies before birth. She describes in lay terms the EVERREST project, its background and results to date and puts the project into context with other research in this area.

Her presentation is now available in full on [YouTube](#) and has been written up in the [Evening Standard](#).
